23. Problem: (use additional Sheets if necessary)
GDAAC needs to keep track of Stability metrics. There are already 2 existing processes in place towards this end. 1. The GDAAC OPS Summary Word Document. 2. The EDC Stability spreadsheets. The GDAAC needs software that will receive the information entered by the OPS Controllers in the OPS Summary(1) and feed this information to the EDC spreadsheets.(2).

24. Proposed Solution: (use additional sheets if necessary)
A WWW page that looks like the current OPS Summary Word Document and yet feeds stability info to the spreadsheets. It should be noted that the spreadsheet is an engineering log while the OPS Summary is an operations log. Therefore the WWW Ops Summary page will need to be reviewed weekly by an engineer for process consistency. *operations Specialist*
THIS CCR IS FORWARDED TO THE M&O CCB FOR INFORMATION AND DISIMINATION TO THOSE DAACS INTERESTED. AT THIS TIME. THERE IS NO KNOWN IMPACT TO THE ECS BASLINE.

25. Alternate Solution: (use additional sheets if necessary)
The OPS Controllers could enter data directly into the modified EDC Spreadsheet.

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
Not fulfill contractual obligations for RMA, not have easily accessible information w/regard to system performance, stability, other for trending analysis. RF

23. Problem: (use additional Sheets if necessary)
The databases changes need to be updated to the HW/Database Mapping baseline at all sites. The current posted version does not have device allocation information.

24. Proposed Solution: (use additional sheets if necessary)
Change the HW/Database Mapping baseline document for all DAACs from the current one part to include three additional parts to display detailed information. The new format includes: (1) Databases (same as current), (2) Devices, (3) Database Allocation, and (4) Database Segment Device Allocations.

23. Problem: (use additional Sheets if necessary)
The existing anonymous ftp directive needs to be updated for IRIX 6.5. Also, the ability to log the directory in addition to the filename in syslog has been determined so that automated cleanup can be implemented.

This directive was tested in the PVC during Drop 6A scenarios.

24. Proposed Solution: (use additional sheets if necessary)
Implement the directive on all ECS SGI anonymous ftp servers.

25. Alternate Solution: (use additional sheets if necessary)
N/A

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
anonymous ftp will continue to be broken and automated cleanup will not be possible.

23. Problem: (use additional Sheets if necessary)
The Instrument Teams have asked for an advanced version of the SCF Toolkit that is capable of working with HDF 5. We have been directed by ESDIS (ESD 100) to release this version so that the ITs can use it for SCF development.

24. Proposed Solution: (use additional sheets if necessary)

Release a HDF 5-capable version of the SCF Toolkit to the SCF Users. Note: this release is done by EDHS ftp site (not SMC) because this release of software does NOT go to the DAACs; but only to the Instrument Teams.
